Lab sheet -03

```
CREATE DATABASE employee_db;
USE employee_db;
CREATE TABLE employees (
id INT PRIMARY KEY AUTO_INCREMENT,
name VARCHAR(100),
position VARCHAR(100),
salary DECIMAL(10, 2)
);
-- Insert some sample data
INSERT INTO employees (name, position, salary) VALUES (‘John Doe’, ‘Software
Engineer’, 75000);
INSERT INTO employees (name, position, salary) VALUES (‘Jane Smith’, ‘HR
Manager’, 65000);
INSERT INTO employees (name, position, salary) VALUES (‘Steve Brown’, ‘Team
Lead’, 85000);
//Code for DatabaseConnection.java:
packagejdbcexample;
importjava.sql.Connection;
importjava.sql.DriverManager;
importjava.sql.SQLException;
/**
 *
 * @author student
 */
public class DatabaseConnection {
private static final String URL ="jdbc:mysql://localhost:3306/employee_db"; // Database URL
private static final String USER = "root";
private static final String PASSWORD = "";
```

```
public static Connection getConnection() throws SQLException {

try {

Class.forName("com.mysql.cj.jdbc.Driver");

returnDriverManager.getConnection(URL, USER, PASSWORD);
}
catch (ClassNotFoundException | SQLException e) {
System.out.println("Connection failed:" + e.getMessage());
throw new SQLException("Failed to establish connection.");
   }
 }
}
```

1. Open NetBeans IDE 8.2.

2. Create a new Java application:

- Go to File > New Project.
- Select Java as the project type, and choose Java Application.
- Name your project JDBCExample.
- 3. Add MySQL JDBC Driver to your project:
- Right-click on the project in the Projects pane.
- Select Properties.
- In the Libraries tab, click Add JAR/Folder.
- Navigate to the location of your mysql-connector-java-x.x.xx.jar file and add it.
